

Says

What have we heard them say?
What can we imagine them saying?

Thinks

What are their wants, needs, hopes, and dreams?
What other thoughts might influence their behavior?

it provide
reliable insights,
and empowering
stakeholders to
make informed
decisions .

it is user-friendly
interface and
transparency for
stakeholders.

it says the
right time to
purchase a
house.

it says about
the cost
effectiveness
to predict the
data.

it is the fastest
way to know
the real estate
markets.

it is useful
for potential
home
buyers.

Analysing housing
prices in
metropolitan areas of
india

businesses might
have trouble
attracting and
keeping talented
employees due to
housing affordability
issues.

the cost of living
in metropolitan
areas is
becoming
increasingly
unaffordable.

it will give the
good knowledge
about real estate
markets if we gain
that, we will save
more money.

the different
metropolitan house
markets operate
independent to one
another.

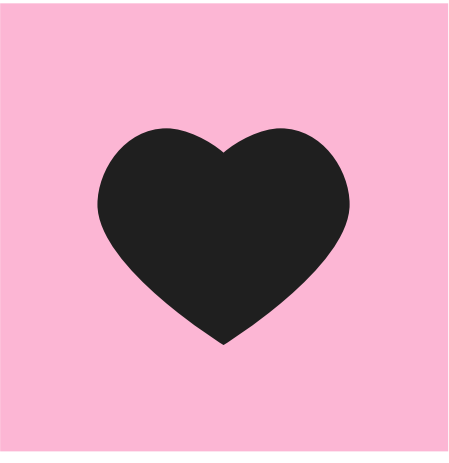

feels good
about the
affordability
and location.

the price keep
rising, making it
harder for young
people and
families to buy.

Does

What behavior have we observed?
What can we imagine them doing?

Feels

What are their fears, frustrations, and anxieties?
What other feelings might influence their behavior?
